

5-AXIS LASER CUTTING

Experience unparalleled production of complex parts with 5-axis laser cutting from O'Neal Manufacturing Services. In a single setup, our 5-axis laser tilts and rotates producing multifaceted parts and complex designs. Stampings, spun parts, hydro-formed parts, and welded fabrications can be laser cut from virtually any angle with speed and precision.

OMS provides optimal manufacturing efficiencies by delivering high-quality parts with tight tolerances. Our state-of-the-art laser cutting system and 2nd and 3rd-step fabrication services support repeatable production of your complex parts.

5-AXIS LASER CUTTING FOR ORIGINAL EQUIPMENT MANUFACTURERS

Material Handling, Power Generation, Trucks & Trailers, Construction Equipment,
Renewable Energy, Railroad Equipment
