

CNC ANGLE LINE

Clips, angles, gusset plates, and braces are essential components of the metal construction process. By utilizing our CNC angle lines, we improve structural steel fabrication efficiency by producing segments of angle and bar stock at a rapid speed and with no manual drilling.

Our CNC angle lines are capable of punching and shearing angle or flat bar essential for component manufacturing and structural fabrication. Maintain part accuracy through our multi-process capabilities designed to improve productivity and reduce scrap. Eliminate time consuming sawing, burning, and machining through O'Neal Manufacturing Services angle and flat bar fabrication.

CNC ANGLE LINE FOR ORIGINAL EQUIPMENT MANUFACTURERS

Construction Equipment, Trucks & Trailers, Shipbuilding, Industrial Equipment, Railcar & Tank Car, Material Handling, Renewable Energy, Communication, Power Generation, and others...
