

LARGE PRECISION FORMING

O'Neal Manufacturing Services has the power to form and bend your large and heavy parts with ease. Our TRUMPF TruBend 8010 is the newest machine in our lineup of precision bending and forming capabilities. With a usable open height of up to 34 inches, large throat depths, and a max press force of 1,100 tons, our press brake will tackle parts up to 23 feet long with incredible accuracy.

Featuring hydraulic tool clamping, laser-controlled bend, and a 6-Axis back gauge, our TRUMPF TruBend 8010 brings repeatable precision to every part. O'Neal Manufacturing Services provides reliable forming and bending redundancy bringing efficiency gains and accuracy improvements to your supply chain.
