

PUNCHING

O'Neal Manufacturing Services (OMS) offers fully automated steel punching services for high-volume manufacturing. Utilizing CNC machinery, OMS makes the most of your tooling budget by producing parts with a high pierce count. We're committed to meeting your production schedule with accuracy and repeatability from start to finish.

Our equipment has the capacity to load, punch, shear, notch, bend, and unload light gauge sheet metal. Experience short cycle times, versatile equipment, and a wide range of material capacity from your fabrication partners at OMS.

PUNCHING FOR ORIGINAL EQUIPMENT MANUFACTURERS

Agriculture Equipment, Banking, Vending, Kiosk, Material Handling, Industrial Equipment, Military Equipment, Power Generation, Security & government, Surgical & Medical, Transportation
