

SPECIAL PROFILES

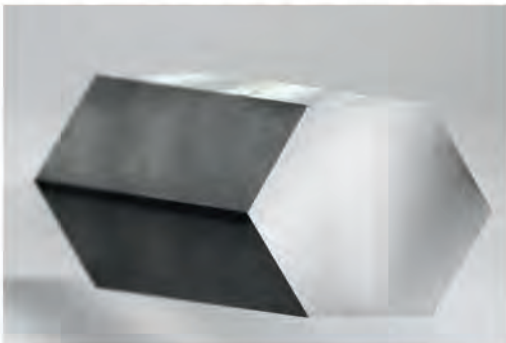

Custom Steel Profiles Tailored for Manufacturers of Industrial Equipment

O'Neal Manufacturing Services offers precision cold drawn steel profiles, custom-designed for diverse market applications. Experience the highest quality complex shapes with the tightest tolerances.

In-House Stocking Programs for JIT Delivery

We specialize in high volume, cut-to-length, cold-drawn sections and ship on demand to reduce your labor, scrap, and machine costs. Our partnerships with multiple mill sources allow us to control logistics and offer in-house stocking programs for reliable and repeatable JIT delivery.

Channels, I-Beams, Carriage Bars, and More.

In addition to custom steel profiles, we offer popular standard profiles which are hot rolled and used throughout the material handling and linear motion industries. Our on-prem capabilities include weldments, kitting, and packaging service, saving you time and logistical expenses.
